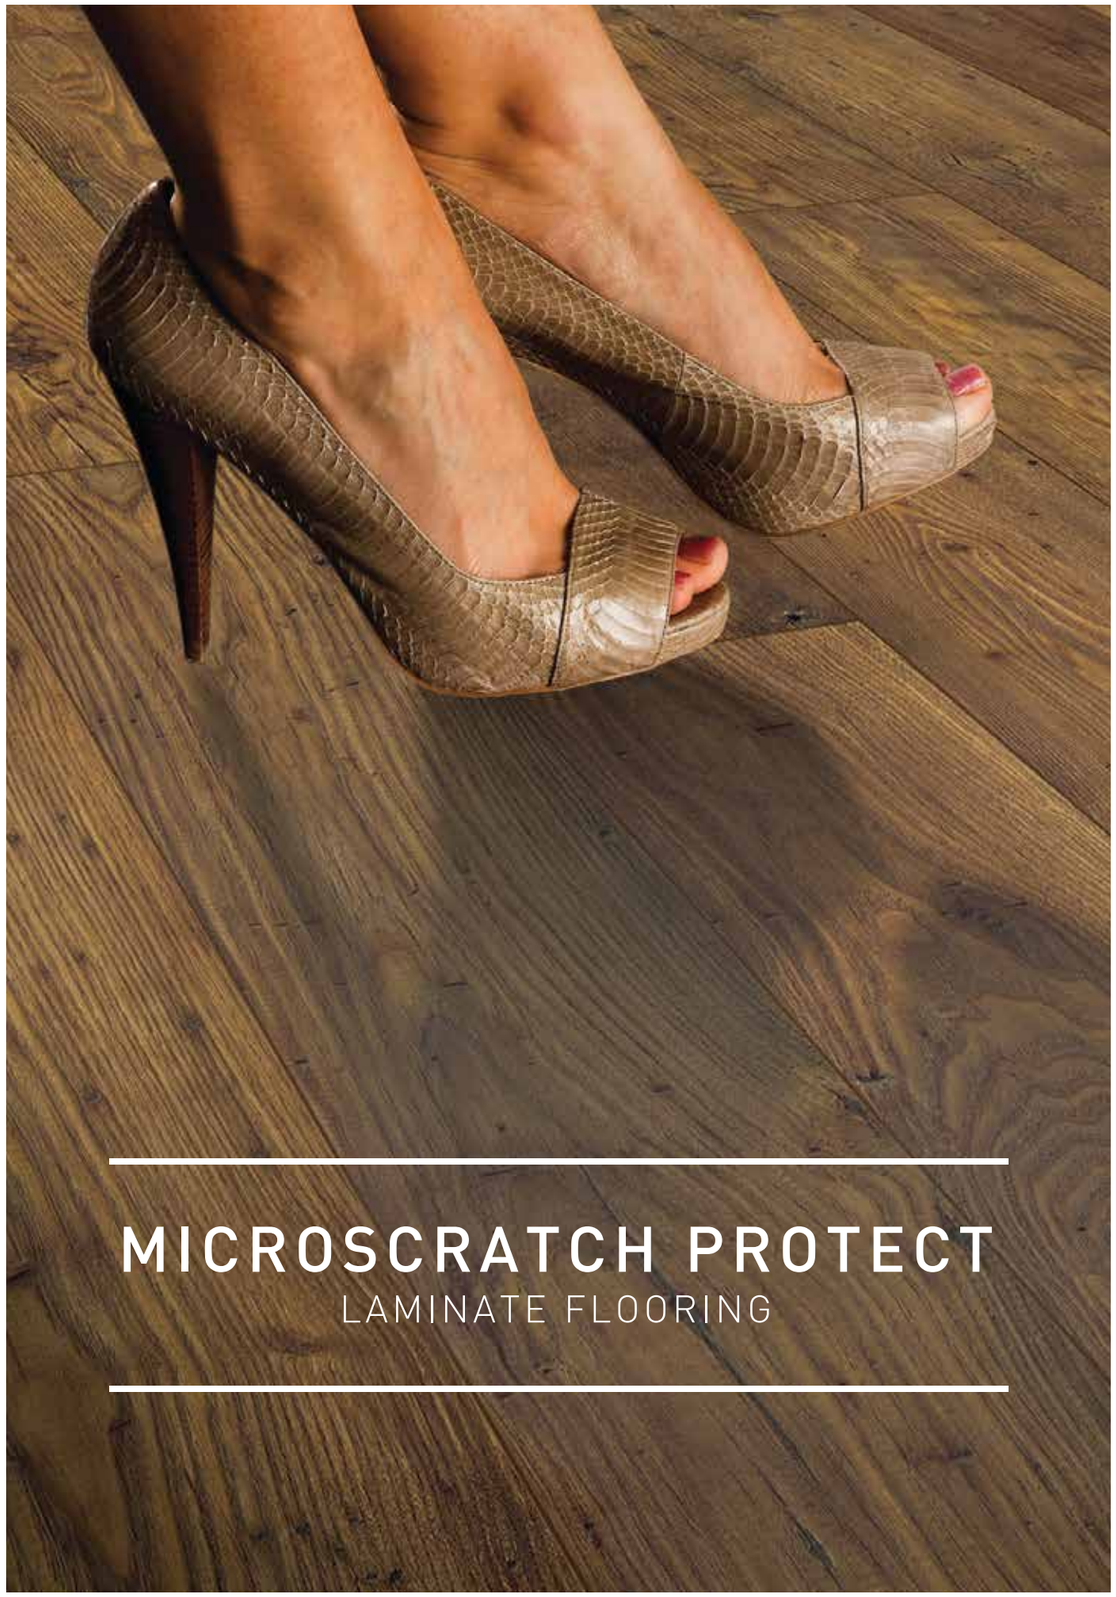
ANTI BACTERIAL
LAMINATE FLOORING

Healthy floors

Floor hygiene is significant for our health. The microbes that enter the house due to various reasons such as shoes, remains, pets etc. and that cannot be seen with the naked eye, easily lead to allergies and non-allergic diseases. However, as a result of Veroxfloor's anti-bacterial coating property, not only the development of microbes is prevented, but also it is ensured that hygienic cleaning is more efficient and thorough. This way, you can live a comfortable and healthy life in a clean environment with your loved ones.



MICROSCRATCH PROTECT
LAMINATE FLOORING

FEATURES

Guarantee
All Verox Floor laminate floors are put through a series of rigorous tests in order to comply with international quality standards, which is why we grant an extensive guarantee with every product. You can be rest assured that, whatever range you choose, it´s going to be easy to maintain and will give you enjoyment for many years to come.

Stain and Imprint Resistant
Whatever you might spill, be it red wine, oil or jam, don't panic; it can be easily removed. Verox Floor is also abrasion resilient, robust and proven to be one of the most resistant floorings available, even heavy furniture won't leave an imprint. Please use felt pads for your furniture and ensure that swivel chairs are fitted with soft castors.

Twin Clic
The Verox Floor Twin Clic system has been specifically designed to make fitting your laminate flooring as easy and hassle free as possible. The Clic and groove profiles allow individual panels to be joined together quickly with minimal tools or complications.

1clic2go
Even in hard to reach places like corners, doors and under radiators, the ingenious "1clic2go" system makes installing Verox Floor floors simpler and faster than ever. The tongue & groove joint along the length of the panel is placed in position from above and fixed flush with the adjoining panel. The panels are then securely interlocked as the patented "1clic2go" beading latches into position with an audible click. **Quick. Easy. Secure.**

Moisture Protection
Lower surface, which is resistant against intumescence and safe click combinations (systems) ensure full protection against humidity.

Endless Beauty
Continuity of decor and structure from panel to panel. In addition to almost invisible joints at the panel's short side, this feature creates the look of never ending planks and leads to a visual enlargement of your room.

TUV
Regular independent quality checking via external testing and auditing of the production process as part of the quality assurance system of Verox Floor.

A.B.C. Anti Bacterial Coating
We know that keeping your floor as clean as possible will be important to you and that means minimising the risk from germs. We can't see germs, but we all know the problems they can cause if left unchecked. Allergies can be aggravated and illness can result, which is why Verox Floor has introduced A.B.C., Anti Bacterial Coating that doesn't allow for germs to grow on your flooring. Germs can be present on a floor from many sources such as shoes, spills or animals etc, but Verox Floor A.B.C. Anti Bacterial Coating, works alongside a hygienic cleaning regime, to create peace of mind and a healthy environment.

Diamond Gloss
The high quality of the Authentic Embossed texture is enhanced further by the addition of contrasting multi gloss levels from deepest matt to glossy elements, which reflect the light differently as you move around the floor. It emphasizes the depth of the structure and illustrates the character of natural wood perfectly.

Handscraped
A breathtakingly elegant and realistic oiled wood finish, with gentle irregular undulations, inspired by traditional Amish craftsmanship. The soft matt surface replicates the hardwood area of solid flooring gently polished over time due to footfall. Meanwhile the deep matt pores are highlighted with glossy accents.

Floor Heating
The floor, which is specially designed for under floor heating has six levels, these six levels, which are used at the same time also smooth the lower surface.

Microscratch Protect
This especially durable surface will protect your floors even better against micro-scratches which can occur through heavy use. With Microscratch Protect, your flooring will have the best possible protection against everyday wear and tear.

Anti-slip Classes
Safety is something we put great emphasis on. Classification in anti-slip classes (R9 and R10) has been achieved through specially developed surface structures, which address the requirements for floor coverings in the workplace and commercial areas where a high risk of slipping is present.

Eco Friendly
All Verox Floor floors are environmentally friendly as standard made of 95% wood sourced from sustainably managed forests. What's more, the entire production chain – from raw materials to the finished product – has been certified and is regularly inspected by independent experts, ensuring peace of mind for you – and protection of our environment.

* Statement on level of emission of volatile substances in indoor air posing a toxic threat during inhaling - on a scale from A + (very low-emission) to C (high-emission).

PROTECT YOUR HEALTH

CONSIDER ENVIRONMENT

Eco-friendly

All Veroxfloor products are environment friendly given their recyclable structures. In addition to this, from raw materials till the finished product, all of the certificates that are required have been taken and all necessary checks and controls have been made throughout the production chain by specialized experts in order to protect the environment and make you feel at ease. Moreover, as a laminated flooring brand, Verox Floor [R9-R10], which has the highest antiskid surface class standards determined globally, has been especially developed for places, where the risk of slipping is high such as our working, business and living spaces.
